Green Power Information

Park Electric Cooperative, in conjunction with the Basin Electric Power Cooperative, have teamed together to bring our members green power. Park Electric Cooperative offers green power through Basin Electric Power Cooperative's PrairieWinds - Energy in Motion Green Tag Program. Green Tags are the intangible environmental benefits associated with energy produced from renewable resources.

Agreement

I agree to purchase green tags through Park Electric Cooperative's Green Power Program. I agree to pay the premium for green power which is currently .195 cents ($0.00195) per kilowatt hour. I understand this is an additional expense above normal rates for each kilowatt hour consumed.

If the rate for Green Tags increases, notification will be given in the Park Sparks, Park Electric's monthly newsletter, and on our website at www.parkelectric.coop. If I choose to discontinue participation in the Green Power Program, I must notify Park Electric Cooperative otherwise my commitment to purchase green power at the new rate will automatically continue.

Park Electric reserves the right to discontinue the Green Power Program at any time if Green Power is no longer reasonably available or Park Electric determines it is not longer feasible or cost effective to continue the program.
